

Annual rate of change of declination at 2027.5 from the World Magnetic Model (WMM) 2025. Red - positive (easterly) change, blue - negative (westerly) change, green - zero change. Contour interval is 2'/year, white star is the location of a magnetic pole and the projection is Mercator. This is an example of an isoporic chart. British Geological Survey © UKRI 2024
